

# Colour & Pattern

## National Curriculum

In Literacy we will be writing fictional narratives in fantasy settings. We will be reading and writing about the story of the Rainbow Fish. We will use lots of exciting adjectives to make our writing colourful and lively. We will also be reading and writing Aboriginal traditional tales.

As Mathematicians, alongside our usual curriculum we will be investigating patterns of shapes and numbers.

As Scientists we will be investigating the human body and exploring the senses. We will learn about our similarities and differences to other animals.

As Geographers we will be studying the colourful landscapes and culture of Australia and its peoples.

## The Arts

As artists we will be looking at the abstract primary colour and line work of Piet Mondrian and producing artwork in his bold visual style.

## Danger

As safe citizens we will be looking at danger in the world around us, assessing risks and staying safe during the building work.

## Sport

As active pupils we will be playing sports and games to stay fit and healthy. We will think about how our bodies work and learn to play effectively as a team.
