

The Great Outdoors.

National Curriculum

In Literacy we will be writing fictional narratives in fantasy settings. We will also produce poetry inspired by nature and our surroundings.

As Mathematicians, alongside our usual curriculum we will be collecting and presenting data about environmental issues.

As Scientists we will be investigating the growth of plants and those found in our local environment. We will learn about plants, animals, food chains and life cycles.

As Historians we will be investigating the history of our local area. As Geographers we will be carrying out a local study investigating jobs, transport, physical and human features, maps symbols and keys.

As Artists we will be looking at the work of Andy Goldsworthy and producing beautiful sculptures built from natural materials in outdoor settings.

Diversity

As global citizens we will be celebrating differences, learning about beliefs from around the world and their connections to our own.

Enterprise

With our enterprising minds we will be thinking of ways to improve our local environment for everyone.

Environment

As eco-learners we will be learning in the great outdoors. Developing our 'green-fingers' and raising awareness about environmental issues. We hope to arrange a trip to explore bio-diversity.
