

# Jungles

## National Curriculum

In Literacy, we will be studying different stories set in the jungle with links to poetic language. Later we will be reading and writing persuasive texts with links to issues and debates.

As Mathematicians alongside our usual curriculum work we will continue to make links to the Jungle topic where possible.

As Scientists we will be learning how about animals, classification, habitats and adaptation. This will include some Forest School activities.

As Geographers we will learn about the location of different jungles around the world with a particular focus on the Amazon. We will learn about different climates and weather.

As Design Technologists we will design and make papier mache animal homes in groups.

As Artists we will investigate and create art based on animal prints. We will also be completing jungle collages.

In ICT we will use branching databases to sort and classify information with links to our animal study.

## Diversity

To broaden our horizons, we will be exploring other cultures through RE and South American cultures.

## Enterprise

To build our enterprising nature we will be learning about money during our maths lessons.

## Environment

To study jungles around the world.  
To be aware of the effect of climate change on our global environment.  
To study different habitats through our science lessons.  
Within our school grounds, we will undertake different forest school activities.
