

Wedmore First School Academy

Supporting Pupils with Medical Conditions Policy

Date of Implementation: June 2016

Review Date: November 2019

Next Review Date: November 2022

Wedmore First School Academy

Supporting Pupils with Medical Conditions Policy

Introduction

Definition

Pupils' medical needs may be broadly summarised as being of two types:

- (a) **Short-term**, affecting their participation in school activities which they are on a course of medication.
- (b) **Long-term**, potentially limiting their access to education and requiring extra care and support

School Ethos

Schools have a responsibility for the health and safety of pupils in their care. The Health and Safety at Work Act 1974 makes employers responsible for the health and safety of employees and anyone else on the premises. In the case of pupils with special medical needs, the responsibility of the employer is to make sure that safety measures cover the needs of all pupils at the school. This may mean making special arrangements for particular pupils so that they can access their full and equal entitlement to all aspects of the curriculum. In this case, individual procedures may be required. Wedmore First School Academy is responsible for making sure that relevant staff know about and are, if necessary, trained to provide any additional support that pupils with medical conditions (long or short term) may need.

The Children and Families Act 2014 places a duty on schools to make arrangements for children with medical conditions. **Pupils with medical conditions have the same right of admission to school as other children and cannot be refused admission or excluded from school on medical grounds alone.** However, teachers and other school staff in charge of pupils have a common law duty to act 'in loco parentis' and must ensure the safety of all pupils in their care. To this end, we reserve the right to refuse admittance to a child with an infectious disease, where there may be a risk posed to others or to the health of the child involved. This duty also extends to teachers leading activities taking place off the school site.

The Headteacher is responsible for ensuring this policy is implemented, staff are appropriately trained, that all individual healthcare plans (IHCP's) are communicated to relevant staff and those responsible update/review IHCP's when necessary (when needs change or at least annually).

The parent/carer is responsible for supplying the child's medication and must supply the school with all relevant and up to date information needed in order for proficient care to be given to the child. However, the school takes advice and guidance from a range of sources, including Health professionals and the child's GP in addition to the information provided by parents in the first instance. This enables us to ensure we assess and manage risk and minimise disruption to the learning of the child and others who may be affected (for example, their class mates).

Our Aims

- To support pupils with medical conditions and additional needs so that they have full access to education, including physical education and educational visits
- To ensure that school staff involved in the care of children with medical needs are fully informed and adequately trained by a professional in order to administer support or prescribed medication
- To comply fully with the Equality Act 2010 for pupils who may have disabilities or special educational needs.
- To write, in association with healthcare professionals, Individual Healthcare Plans (IHP) where necessary
- To respond sensitively, discreetly and quickly to situations where a child with a medical condition requires support
- To keep, monitor and review appropriate records

Unacceptable Practice

While school staff will use their professional discretion in supporting individual pupils, it is unacceptable to:

- Prevent children from accessing their medication;
- Assume every child with the same condition requires the same treatment;
- Ignore the views of the child or their parents/carers; ignore medical advice;
- Prevent children with medical conditions accessing the full curriculum, unless specified in their Individual Healthcare plan;
- Penalise children for their attendance record where this is related to a medical condition;
- Prevent children from eating, drinking or taking toilet breaks where this is part of effective management of their condition;
- Require parents to administer medicine where this interrupts their working day;
- Require parents to accompany their child with a medical condition on a school trip as a condition of that child taking part.

Entitlement

Wedmore First School Academy provides full access to the curriculum for every child wherever possible.

We believe that pupils with medical needs have equal entitlement and must receive necessary care and support so that they can take advantage of this. However, we also recognise that employees have rights in relation to supporting pupils with medical needs, as follows:

Employees may:

- Choose whether or not they wish to be involved (unless specified in their job description)
- Receive appropriate training
- Work to clear guidelines
- Bring to the attention of the Leadership & Management Team (LMT) any concern or matter relating to the support of pupils with medical conditions

In line with our safeguarding duties and duty of care, the Academy will not put any pupils at unnecessary risk. Therefore, under certain circumstances we may request a child does not come to school on a temporary basis when it could be detrimental to their health, safety or wellbeing. While unusual, this may be extended to school trips.

Expectations

It is expected that:

- Parents will inform school of any medical condition which affects their child;
- Parents will supply school with appropriately prescribed medication, where the dosage information and regime is clearly printed by a pharmacy on the container;
- Parents will ensure that medicines to be given in school are in date and clearly labelled;
- Parents will co-operate in training their children to self-administer medicine if this is appropriate, and that staff members will only be involved if this is not possible;
- Medical professionals involved in the care of children with medical needs will fully inform staff beforehand of the child's condition, its management and implications for the school life of that individual;
- Our school will ensure that, where appropriate, children are involved in discussing the management and administration of their medicines and are able to access and administer their medicine if this is appropriate, eg. using an inhaler;
- School staff will liaise as necessary with Healthcare professionals and services in order to access the most up-to-date advice about a pupil's medical needs and will seek support and training in the interests of the pupil;
- Transitional arrangements between schools will be completed in such a way that our school will ensure full disclosure of relevant medical information, Healthcare plans and support needed in good time for the child's receiving school to adequately prepare;
- Individual Healthcare plans will be written where required, monitored and reviewed at least annually but more frequently if needs change.

Procedure

The Governing Body of Wedmore First School Academy ensures that an appropriate level of insurance is in place and reflects the level of risk presented by children with medical conditions. The insurance covers staff providing support to pupils with medical conditions. From time to time, the school may need to review the level of cover for health care procedures and any associated training requirements.

Information

Children with serious medical conditions have their photo and brief description of condition, along with any other necessary information, in the staffroom. Children with medical conditions which may require emergency attention, e.g. epilepsy, diabetes, will have their names and an Individual Healthcare Plan clearly accessible in their classroom, and all adults dealing with the child will have their attention drawn to this information. All other medical conditions will be noted from children's SIMs records and this information will be provided to class teachers annually.

In an emergency

In a medical emergency, most staff have been appropriately trained to administer emergency pediatric first aid if necessary. Named personnel have been identified, communicated and displayed in all areas of the academy.

If an ambulance needs to be called, staff will:

- Outline the full condition and how it occurred
- Give details regarding the child's date of birth, address, parents' names and any known medical conditions.

Children will be accompanied to hospital by a member of staff if this is deemed appropriate. Staff cars should not be used for this purpose. Parents must always be called in a medical emergency, but do not need to be present for a child to be taken to hospital.

Administration of medicines

Only essential medicines will be administered during the school day. These will be only those prescribed by a qualified medical practitioner. Parents must submit a written permission slip before any medicine is administered. Medicines to be given during the school day must be in their original container. Controlled drugs can also be administered, subject to all other conditions as described in this policy.

Essential medicines will be administered on educational visits, subject to the conditions above. A risk assessment may be needed before the visit takes place. Staff supervising the visit will be responsible for safe storage and administration of the medicine during the visit.

Named staff members will give medicines (see end of policy). Before administering any medicine, staff must check that the medicine belongs to the child, must check that the dosage they are giving is correct, and that written permission has been given. Any child refusing to take medicine in school will not be made to do so, and parents will be informed about the dose being missed. All doses administered will be recorded in the Administration of Medicines folder (located in the school office). This includes any doses of inhalers for asthma. Children are able to go to the school office at any time to make use of their inhaler. All inhalers must be taken on educational visits, however short in duration.

All medicines will be stored safely. Medicines needing refrigeration will be stored in the staffroom fridge. Some medicines (epipens) will be kept in the child's classroom and carried with the children, for ease of access if needed. All medicines must be clearly labelled. Prescribed medicines will be kept in the storage cabinet in the main office. Access to these medicines is restricted to the adults authorised to administer medicines. Medicines/inhalers for Nursery children are stored in their classroom (Duck Class). Any inhalers for Robin Class children are stored in their classroom to enable immediate access if necessary.

Epi-pens – Any member of staff can administer an epi-pen in an emergency.

The pen (cap off) should be pushed against the child's thigh, through clothing if necessary. The pen should be held for a count of 10 seconds before being withdrawn. An ambulance must be called for a child who has needed the administration of an epi-pen. Parents should be contacted immediately after this call has

been made.

Complaints

Should parents be unhappy with any aspect of their child's care at Wedmore First School Academy, they must discuss their concerns with the school. This may be with the child's class teacher in the first instance, with whom any issues should be managed. If this does not resolve the problem or allay concern, the problem should be brought to a member of the leadership team, who will, where necessary, bring concerns to the attention of the Head teacher. In the unlikely event of this not resolving the issue, the parents must make a formal complaint using the school's Complaints Procedure.

Trained Staff

There are many staff trained in Emergency First Aid, Pediatric First Aid and the full First Aid at Work qualification. Details of those trained can be found displayed in all classrooms and communal areas of the Academy – including the reception area.

The Headteacher/SENCO are responsible for ensuring relevant staff are trained and refreshed. This will include specific training such as EpiPen training.

Linked policies:

First Aid & Medical Policy
SEND policy

This policy will be reviewed every three years or sooner if necessary.

Approved by the Governing Body:

Signed by Chair:

26/11/19. D.G. WOGAN.
