and
investigation**

What Science at Wedmore First School Academy looks like

Children are encouraged to generate questions and answers questions posed to them

Children are encouraged to work together as a team

Children are provided with opportunities to work inside and outside

Children are provided with fun, engaging and practical learning experiences

Children work resiliently to make progress and gain new skills or knowledge in every session

Children are provided with opportunities to find out about science in the wider world and across the curriculum

Children practically explore, investigate, predict, compare, classify and test ideas (including their own)
